

Joseph Harwood

Amsterdam, Netherlands | +31 627 994 710 | joeharwood3@gmail.com | devjoe.io

Full-stack developer with 7+ years of experience shipping high-impact web applications. Built AI products at Booking.com and co-founded a marketplace that grew to 3,000+ users organically.

EXPERIENCE

Full-Stack Engineer Nov 2025 – Present

DevJoe (Freelance Consultancy) | Amsterdam

- Delivering end-to-end web applications, including marketing sites with headless CMS (Sanity, Contentful), SaaS products, and API integrations.
- Handling full product lifecycle from database design and authentication through to deployment, payments, and real-time features.

Software Engineer II May 2022 – Nov 2025

Booking.com | Amsterdam

- Launched Booking.com's first AI Trip Planner, integrating ChatGPT API to deliver personalised travel recommendations at scale.
- Led ideation and implementation of a neighbourhood feature on search results, generating **€19.7M/year** in customer equity value.
- Built no-code recommendation carousels that reduced marketing time-to-market from 2 weeks to 2 days.

Software Engineer Nov 2021 – May 2022

Appical | Amsterdam

- Led migration of flagship products from JSP to React and TypeScript, achieving a 200% improvement in feature implementation speed.
- Developed OpenID Connect authentication flow, improving security and efficiency of JWT token handling.

Software Engineer Intern Jul 2019 – Sep 2020

IBM | London

- Built a performance review platform adopted by all early-career personnel at IBM UK (5,000+ active users).
- Modernised IBM Netcool Operations Insight, migrating WebGUI to React with comprehensive E2E and unit testing.

PROJECTS

Weeknights weeknights.nl

- Co-founded a two-sided marketplace connecting people with social and hobby clubs in Amsterdam. Onboarded 50+ clubs with live ticketing and revenue generation.
- Grew to 3,000+ monthly active users organically through SEO strategy, reaching 400–500 daily search impressions. Full-stack: Next.js, Supabase, and Playwright.

RailGPT railgpt.app

- Built an AI-powered train travel planning agent for the Netherlands, simplifying complex multi-leg journeys into conversational queries. Next.js, ChatGPT API, and TypeScript.
